

John Nichter

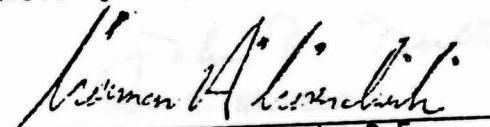

EPA/State approve the plans and specifications to construct this facility, as described above, contingent upon a 60-day public comment period to begin upon notice in the Environmental Notice Bulletin, with the following conditions:

1. Resolution of the Town of Niagara permit issue, now in Federal Court;
2. Obtaining of the necessary easements by Occidental Chemical Corporation;
3. Clarification of the design assessment prepared by Wendel Engineers, P.C. as follows:
 - a) design standards for ancillary equipment must be specified in Section (A.)(1)
 - b) effect of APL/NAPL on ancillary equipment must be specified in Section (A.)(2)
 - c) results of traffic loading on PVC jacketing pipe must be specified in Section (A.)(4)
4. Use of an approved Health and Safety Program for Special Construction Activities.

Approval by EPA/State of the operation of the facility will occur upon finalization and approval of the Operations Manual.

Please submit the Operations Manual for this facility as soon as possible and the revisions specified in Condition 3 above by July 1, 1987.
